

MINING, BUSINESS AND STOCKS

AVERAGE DAY ON LOCAL EXCHANGE.

Columbus Con. Active on Open Board in Slightly Selling Market.

USUAL ACTIVITY IN MAY DAY.

Conditions Generally Normal and the Sales Well up to the Average.

Business on the local stock exchange during the day was of about average volume and prices, and remained normal. Nine thousand shares of New York Con. changed hands at prices ranging from 31 to 32. Six hundred shares of Yankee Con. sold at 34 to 35, and the usual brisk trading in May Day was well sustained, about 11,000 shares changing hands at figures ranging from 25 1/2 to 26. Columbus Con. was active on the open board with a distinct downward tendency. The market opened at 27 1/2, but during the morning the price dropped as low as 25 1/2. About 2,000 shares sold, mostly in scattered lots.

RICH STRIKE.

Gibraltar Mines Syndicate Have Good Values in Cross Vein.

Reports regarding the cross vein recently struck by the Gibraltar Mines syndicate continue of a favorable nature. J. H. Shockey, vice president and consulting engineer of the company states that the ledge is entirely new and a crosscut at one point shows a width of fully 20 feet. The vein matter consists of altered rhyolite and will average fully 35, the entire width. The ore in places is said to be rich in gold and an assay would undoubtedly show large values. The find is regarded as of considerable importance, demonstrating as it does that ore bodies are not confined to any one section, but are scattered throughout the entire Bullfrog district.

NEW RAILROAD.

Continental Mines & Smelting Corporation Expect to Begin Construction.

The proposed railroad of the Continental Mines & Smelting corporation, having Alta as its objective point, is now regarded as an established fact. President and General Manager Henry M. Crowther has just returned from a three week's trip to the coast, where he made a particular study of mountain railroads. Plans are now being prepared and it is expected that construction will be commenced in the near future. Once started, the work will be put through to a finish with as little delay as possible.

EUREKA PROSPEROUS.

All Mines Doing Well and General Conditions Good.

Mr. R. F. Ayson was a recent visitor to Eureka and returned enthusiastically in the cause of that bustling and prosperous community. Mr. Ayson was extended the privilege of going through the May Day, and he states that what he saw simply strengthens his faith in the property. "The May Day shipped nine cars of ore last week," said he, "and they have enough ore in sight to ship a car a day for the next year. Everybody is confident in the future of the company, even the miners were satisfied as they go about their work."

The Beck Tunnel, the Uncle Sam and the Yankee Con. are all in good shape and doing well. The Beck Tunnel expect to pay a three cent dividend this month, which will be an increase of half a cent over that of last month. All the mines have improved the roads, and they certainly needed it. The average profit on a car of May Day ore is said to be from \$50 to \$70, and from my own observation I am prepared to believe it. May Day will be paying dividend within the next few weeks.

YANKEE CON. FIRE.

No Change in Price of Stock as Result of Recent Conflagration.

It is now announced that new machinery will be purchased at once and installed as a result of the recent fire in the Yankee Con. mine. While the company was practically fully insured a fair sized loss cannot help but result and little if any development work will be done for some time to come. The company has no lower under present conditions and the bad condition of the roads in the vicinity of the mine renders the shipping of ore very difficult. The company has a large ore reserve, however, and this will be drawn on just as soon as the roads permit. The fire had no effect on the price of the stock.

ORE SHIPMENTS.

Output as Shown by Figures Large and Steadily Increasing.

The ore shipments over the Tonopah Railroad for the week ending Thursday night as reported by the Western Ore Purchasing company, aggregated 2,156 tons, divided as follows: From Tonopah-Tonopah company, 1,600 tons; Tonopah Extension company, 550 tons; Belmont, 40 tons; Montana-Tonopah, 35 tons; Midway, 14 tons; West End, 54 tons; Jim Butler, 46 tons. From Goldfield, 300 tons.

MORE ABOUT HIKO.

J. A. Bush, Mining Engineer, Has Every Confidence in District.

J. A. Bush, mining engineer of Hiko, is at present registered at the Cullen. Mr. Bush has any amount of confidence in Nevada as a whole and Hiko and vicinity in particular. Some excellent values have been obtained and there seems to be little doubt of the ultimate future of the district from a mining standpoint.

HEINZE STILL ABSENT.

Expected to Arrive This Morning But Has Not Yet Materialized.

In spite of the eagerness with which he is awaited, E. Augustus Heinze continues to absent himself from Salt Lake City. In a message received late yesterday evening he was supposed to have reserved Pullman accommodations from Butte, and as a result every preparation was made for his reception here this morning. As matters stand at present, just when he may be definitely looked for is as much a matter of conjecture as ever, although the delay apparently does little toward diminishing the interest of the local mining world in his movements.

BOSTON COPPER LETTER.

James A. Pollock & Co. furnish the following letter from Boston, received over their private wire: "Stocks more plentiful around the room and the tone was rather heavy, and for a while it looked as though we might get a sharp dip, but before the closing traders were inclined to take on a few shares, and this checked the decline. Closing was unsettled."

DOUBLE STANDARD WORK.

Supplies Go Into Pelican by Pack Train.

The Denver Daily Mining Record prints the following special from Salt Lake: "Charlie Forberg and Elty Beam are cross-cutting one of the veins of Chas. Forberg's Double Standard group on Neoga mountain. This vein was drifted on by Mr. Forberg during the winter, but has not been prospected since it was cut in the tunnel. Manager Dryden is packing supplies to the Pelican. The plant is in good running order and rapid progress is expected from this time on. A 20-ton car of concentrates from the Hidden Treasure was shipped last week. The Wyoming pack train, which has been idle for some time on account of the storms, left last week for the mine to commence packing ore for shipment."

CONCENTRATES.

The annual meeting of the Nevada Superior Mining Co. has been called for May 14.

An assessment of three cents per share has been levied on the stock of the Star Con.

General Manager MacVieche of the Bingham Consolidated is expected to arrive in the city Thursday.

Wayne W. Rose, a former Salt Lake, but now a resident of Manhattan, arrived here yesterday from the latter place.

M. F. Murray, manager of the Gold Development Co., in the Gold Mountain and Marysville districts, is in the city on business.

W. A. Wright, the well known Park City mining man, spent Tuesday in Salt Lake on business. Mr. Wright reports conditions prosperous at the Park.

Mr. F. C. Dern has just been notified of the arrival in New York of his father and mother, Mr. and Mrs. John Dern, after a five months' tour of the continent.

The private wire of James A. Pollock & Co. has shared in the general wreck, not a word having been received from the western metropolis since an early hour this morning.

The Boston Consolidated are now installing a new stamp mill known as the Nissen stamp. The new device is said to do the work thoroughly and economically and experiments with it are said to have resulted very favorably.

It is expected that the contract for another 100 feet of work in the Shakespear Tunnel will be let today by the Columbus Extension Co. A. O. Jacobson, vice president of the company, is in the city in connection with the work.

Stock exchange business in common with practically every other line in San Francisco, is totally disorganized and it will probably be some days before "Price" quotations on Nevada and other stocks can be offered to the public.

Consulting Engineer A. L. Pearce of London, England, is at present in the city, engaged in looking over the Utah-Apex property. Count Ward, well known in connection with this mine, is

still in Salt Lake, but expects to leave in a day or so.

The Pioneer sampler acknowledges receipt of five cars of ore from Nevada, two from Alta and two from Tintic. The Taylor-Brunton Ore Sampler Co. reports receipts of five cars from Tintic, two from Bingham, one from Stockton and 11 from Nevada.

The Boston News Bureau refers to the output of the Mammoth mine as nothing short of marvelous. The company's earnings are said to amount to \$130,000 to \$150,000 per month, partly due of course to 18 1/2 cent copper. 1,250,000 tons of ore are said to be actually in sight.

J. F. Mitchell of Goldfield and associates sold outright the Captain Sam, Kentucky and Arkansas claims, which adjoin the Pine Nut Dexter and Consolidated, for \$200,000. The deal was closed in Goldfield yesterday afternoon, and establishes a high-water mark for cash transactions in Manhattan mining properties.

The Daily Judge Mining company of Park City, Utah, according to good authority, is earning about \$35,000 monthly net, and is retiring the bonds as rapidly as possible. It is expected these will all be taken up by the last of July, and that the company will then be out of debt. It ought to be ready to begin the payment of dividends some time before the end of the year at the rate of 10 cents a share per month.—Tonopah Miner.

A strike is announced on the property of the National Bank Mining company of Goldfield of remarkable richness. The entire camp is said to share in the excitement and congratulations and messages of good will are pouring in on the company from all sources. A number of Salt Lake people are said to be holding shares in the company, but the control is understood to be vested in what is known in Goldfield as the Patrick crowd. While little of a definite nature can be said at this time, it is so to assume that a considerable addition has been made to the value of the company's property.

YOUR CREDIT IS GOOD.

Freed Furniture & Carpet Co.... 18 to 40 EAST THIRD SOUTH STREET.

Metropolitan Life Insurance Co., (Incorporated by the State of New York.)

JOHN R. HEGEMAN, President.

The Company OF the People, BY the People, FOR the PEOPLE.

Assets, \$151,663,477.29

The Metropolitan gained in insurance in force on which premiums are still being paid MORE THAN ANY OTHER COMPANY IN THE WORLD.

The Metropolitan wrote more business in the Industrial Department in 1905 than ever before in any one year.

The Metropolitan wrote more business in the Ordinary Department in 1905 than ever before in any one year.

The Metropolitan wrote more business in 1905 than any other Company in the world. And this for the 12th consecutive year.

The Metropolitan has more premium paying business in force in the United States than any other company.

The Metropolitan has in force one-third of all the legal reserve policies in force in the United States. Its industrial policies in force equal in number all the industrial policies of all the other companies in the United States.

THE RATIO OF EXPENSE TO PREMIUM INCOME IN 1905 WAS THE LOWEST IN THE COMPANY'S HISTORY.

Paid Policy-holders in 1905 for death Claims, Endowments, Paid-up Policies, Dividends, etc., with amount set aside on their behalf as increased reserve—

\$37,755,428.59

Paid Policy-holders since the organization of the Company, plus the amount invested and now on hand for their security—

\$318,264,084.12

This company issues no TONTINE or other forms of deferred dividend policies, in which the amount to be paid to the insured must largely be a matter of ESTIMATE at the inception of the contract, and of DISAPPOINTMENT at its maturity.
